

tesa® 4373 UV

Masking film with special Outdoor Cloth tape

PRODUCT INFORMATION

Product Description

Easy Cover® 4373 UV Extra Strong is a combination of an environment-friendly LDPE film and a UV resistant cloth tape with extra strong adhesion for the masking of large areas in one working step. Product 4373 was especially developed for heavy duty longterm protection outdoors. Once applied it can easily be removed even after 8 weeks of outdoor application without leaving residues. It allows safe and precise fixation on even and slightly rough surfaces. The robust film avoids paint bleeding or leaking to the protected area. The transparency of the film ensures good indoor illumination. 4373 is especially suitable for the masking of large facade parts.

Main Application

It is especially suitable for the masking of windows, balcony balustrades, doors and large facade parts

Technical Data

■ Backing material	cloth	■ Elongation at break	10 %
■ Total thickness	310 µm	■ Tensile strength	60 N/cm
■ Thickness of masking coverage	30 µm	■ UV-resistance	8 weeks
■ Type of adhesive	natural rubber	■ Material of masking coverage	LDPE
■ Adhesion to steel	3.8 N/cm		

Properties

■ Suitable for rough surfaces	++	■ Paint anchorage	++
